

Elastic Adhesive Plaster

Roll 25mm x 1m

Specification Sheet

Product Description:

The Elastic Adhesive Plaster Roll 25mm x 1m is a flexible wound dressing tape designed to provide secure, comfortable support for minor cuts, abrasions, and injuries. Its elasticated fabric allows the tape to stretch and move with the body, making it ideal for joints and high-movement areas such as fingers, wrists, elbows, and knees.

This plaster roll can be cut to size, offering a practical and economical solution for first aid kits, medical rooms, workplaces, schools, and home use. The breathable material promotes airflow to the wound while the strong adhesive ensures reliable hold without restricting circulation.

Specifications:

Specification	Detail
Product Type	Elastic Adhesive Plaster Roll
Width	25 mm
Length	1 m
Material	Elastic fabric with adhesive backing
Colour	Beige / Skin-tone (typical)

Stretch	Yes
