

Flexible Cotton Fabric Plasters – Pack of 100

Specification Sheet

Product Description:

Flexible Cotton Fabric Plasters are designed to provide reliable wound protection while allowing natural movement and comfort. Made from ultra-flexible cotton fabric, these plasters stretch and move with the skin, making them ideal for active use on joints and high-movement areas.

Each plaster features a cushioned non-stick pad that protects minor cuts, abrasions, and wounds while sealing out dirt and germs. The breathable, air-permeable fabric promotes healing, while the strong adhesive ensures the plaster stays securely in place throughout daily activities. Hypoallergenic materials help reduce skin irritation, making these plasters suitable for frequent use.

Specifications:

Specification	Detail
Product Type	Flexible Cotton Fabric Plasters
Quantity	100 plasters
Material	Cotton fabric
Colour	Skin-tone

Flexibility	Ultra-flexible
Pad Type	Cushioned, non-stick
Breathable	Yes (air permeable)
