

# SPECIFICATION SHEET

Product: 2.5L Biological Spill Kit (Blood Spill Kit)

## Product Overview

The 2.5L Biological Spill Kit is a comprehensive, single-use solution for the safe and effective clean-up of biohazardous materials such as blood, vomit, urine, and other body fluids. Designed for use in healthcare, workplace, education, and public environments, this kit promotes safe containment, disinfection, and disposal of potentially infectious materials.

## Intended Use

Used to manage biological spills in environments where bodily fluids may pose a health risk. This includes clinics, hospitals, schools, offices, gyms, ambulances, and hospitality settings. Helps reduce the risk of cross-contamination and infection transmission.

## Features & Benefits

- Complete single-use spill response kit
- Compact 2.5L container – portable and easy to store
- Suitable for blood, vomit, urine, and other body fluids
- Promotes compliance with infection control standards
- Includes PPE for user protection
- Absorbent granules neutralize spills quickly
- Disinfectant wipes ensure hygienic surface cleaning
- Waste disposal bags allow safe containment of used materials

## Kit Contents

- 4 x Pair of disposable gloves
- 1 x Absorbent granules sachet (25g)
- 1 x Disinfectant surface
- 1 x Biohazard disposal bags
- 1 x Instructions for use
- 15 x Paper Towels
- 1 x Cable Tie

## Technical Specifications

Product Name	2.5L Biological Spill Kit (Blood Spill Kit)
Container Volume	2.5 Litres
Use	Single-use / Disposable
Contents	PPE, absorbent granules, scoop/scrapper, disinfectant wipe, bags
Application	Spill response for blood and body fluids

Sterility	Non-sterile components
Shelf Life	2 years (if stored sealed and dry)

### **Compliance & Standards**

Complies with infection prevention guidelines for the safe clean-up of biological material.  
Suitable for use in environments following ISO 45001 and workplace hygiene standards.

### **Storage Instructions**

Store in a clean, dry place at room temperature. Keep sealed until ready for use to maintain product integrity.
