

# Assorted Fabric Plasters

## – Adhesive Wound Dressing Bandages –

## Pack of 20

### Specification Sheet

### Product Description:

These **assorted fabric plasters** are high-quality **adhesive wound dressing bandages** designed to protect minor cuts, grazes, and abrasions while allowing the skin to breathe. Each plaster features a **highly absorbent, non-stick wound pad** that cushions and protects injuries without adhering to the wound itself.

Manufactured from **soft, flexible fabric material**, the plasters comfortably contour to the body and remain secure during normal movement. The **ventilated strip design** allows sweat and moisture to evaporate, helping keep the wound area dry and comfortable.

Each plaster is **individually wrapped**, with sterility guaranteed unless the wrapper is opened or damaged. Supplied in **assorted sizes**, this pack of 20 is ideal for **workplace first aid kits, schools, vehicles, factories, offices, and home use**.
