

Eye Shield – Protective Cover for Post-Surgical or Injury Care

Specification Sheet

Product Description:

The Eye Shield is a lightweight, ventilated protective cover designed to safeguard the eye following surgery, trauma, or irritation. Made from durable plastic, it provides a barrier against accidental contact, dust, and debris while allowing airflow for comfort and healing.

An essential addition to medical kits, clinics, and first aid stations, the Eye Shield is suitable for use with adhesive dressings or gauze pads for enhanced protection.

Specifications:

Specification	Detail
Material	Medical-grade plastic
Design	Ventilated with side openings for airflow
Shape	Anatomically curved to fit over the eye
Attachment Method	Use with tape, bandage, or straps
Reusability	Reusable or single-use (depending on application)
Sterility	Non-sterile (can be sterilized before use)
Size	Universal – fits left or right eye

Contents:

- 1 x Eye Shield (clear plastic)
- Supplied in a sealed pouch or bulk pack
- Usage instructions available upon request

Applications:

- Protection for post-operative eye care
- Prevention of accidental rubbing or contact
- Coverage for minor eye injuries or abrasions
- Use in first aid kits, ambulances, clinics, and hospitals
- Compatible with eye pads or gauze dressings

Features and Benefits:

- Durable and lightweight for patient comfort
- Ventilated design supports healing and reduces moisture build-up
- Fits either left or right eye
- Cost-effective and easy to apply
