

Blue X-Ray & Metal Detectable Plaster Strips

– Pack of 100

Specification Sheet

Product Description:

Blue X-Ray & Metal Detectable Plaster Strips are designed for use in food processing, manufacturing, catering, and hygiene-critical environments where contamination control is essential. The bright blue colour allows for easy visual detection, while the integrated metal component ensures the plaster can be detected by both metal detectors and X-ray inspection systems.

Each plaster is individually sterile (EO sterilised) and manufactured from blue PE material with a secure adhesive backing. These plasters provide reliable wound protection for minor cuts and abrasions while supporting HACCP and food safety management systems. Ideal for workplaces where even the smallest foreign object can become a big problem.

Specifications:

Specification	Details
---------------	---------

Product Type	Wound Adhesive Plaster
Colour	Blue
Detectability	Metal & X-Ray Detectable
Material	Blue PE
Sterility	Sterile (EO)
Quantity	100 Plasters
Size	± 72 mm × 19 mm
Usage	Single Use
Certification	CE 0123
Storage	Cool, dry place

Contents:

- 100 × Blue X-Ray & Metal Detectable Sterile Plaster Strips

Applications:

- Food processing and manufacturing plants
- Catering and restaurant kitchens
- Bakeries and confectionery facilities
- Abattoirs and meat-processing environments
- Hygiene-controlled industrial workplaces
- HACCP-regulated facilities

Features and Benefits:

- **X-Ray & Metal Detectable** – Supports contamination detection systems
- **High-Visibility Blue Colour** – Easy visual identification if lost
- **Sterile EO Packaging** – Suitable for hygienic and food-safe use
- **Strong Adhesive** – Stays in place during movement and manual work
- **PE Material** – Durable and comfortable for everyday use
- **Single-Use Design** – Reduces cross-contamination risk
- **CE Marked** – Complies with applicable medical device standards

PACKAGING:

- Box of 100 sterile blue detectable plaster strips

Please note that the brand of the product may vary based on stock availability.
