

Product Specification Sheet

9kg DCP Fire Extinguisher Vehicle Bracket – Heavy Duty

Product Description:

This heavy-duty vehicle bracket is built to secure a 9kg DCP fire extinguisher in rugged and high-vibration environments. Ideal for commercial, mining, agricultural, and off-road vehicles, the bracket ensures safe storage and quick access to the extinguisher when needed. Manufactured from powder-coated steel, it provides long-lasting corrosion resistance and durability.

Specifications:

- Compatible with: 9kg DCP fire extinguishers (Safequip Brand)
- Material: Powder-coated mild steel
- Finish: Rust-resistant black powder coating
- Mounting: Heavy-duty bolt-on installation with pre-drilled holes
- Retention System: Reinforced locking strap with quick-release latch
- Bracket Design: Wraparound cradle type
- Weight: Approx. 2.4kg
- Dimensions: 370mm (H) x 220mm (W) x 160mm (D)
- Application: Commercial and off-road vehicle installation

Applications:

- Construction vehicles and machinery
- Mining and quarrying equipment
- Agricultural tractors and harvesters
- Commercial trucks and transport fleets
- Off-road and 4x4 vehicles

Features and Benefits:

- Engineered for heavy-duty vibration environments
- Durable steel construction with anti-rust coating
- Secure locking system with fast release access
- Wide cradle for larger extinguishers
- Ideal for fleet and field vehicles

Packaging:

- Includes: 1 x Heavy-Duty Bracket for 9kg extinguisher
- Packaging Dimensions: Approx. 400mm x 230mm x 170mm
- Weight (packaged): ±2.6kg
